SOFT SKILLS

- Teamwork
- Time Management
- Research and Self-learning
- Effective Communication
- Critical Thinking

TECH SKILLS

- Basic Linux commands and virtual lab environments (VirtualBox)
- Metasploit Framework, Nmap, Wireshark
- Visual Studio Code, Sublime Text
- MySQL, phpMyAdmin, XAMPP
- Git & GitHub for version control
- Integration with PHP-based web applications
- Kali Linux (virtual machine setup)
- Adobe Photoshop (image editing and branding)
- GitHub (repository management)

LANGUAGES

- English

PROFILE

Self-driven and passionate Information Systems and Technology student at the University of Lusaka, with hands-on experience in cybersecurity, web development, graphic design, and ethical hacking. Proficient in English, with a growing portfolio of real-world freelance projects and technical repositories on GitHub. Strong analytical and creative abilities, with a personal interest in chess and digital problem-solving. Actively learning through courses like Alison's Cybersecurity program and practical testing via Kali Linux virtual environments.

EDUCATION

Bachelor of Science in Information Systems and Technology

- University of Lusaka – Lusaka, Zambia
Expected Graduation: 2026

Courses & Certifications

- Ethical Hacking Basics (Kali Linux labs, Self-directed)
- Web Development Projects (Personal and Academic)

PROJECTS

Cybersecurity Lab Setup (Kali Linux)

- Set up a personal penetration testing environment using Kali Linux in VirtualBox. Practiced ethical hacking techniques with tools like Metasploit, Nmap, Wireshark, and deployed Cowrie honeypot for attack simulation.

E-Learning Course Management System

- Developed a web-based system for uploading and viewing course materials, allowing admins to manage content and students to access shared documents. Built using PHP, MySQL, and JavaScript.

Freelance Graphic Design Projects

- Delivered custom designs including logos, social media posters, flyers, and business branding materials using Canva and Adobe Photoshop for local clients.

ACHIEVEMENTS & HACKATHONS

Completed Advanced Labs Using Kali Linux

- Set up virtual penetration testing environments and deployed Cowrie honeypot to study attacker behavior.

Freelance Graphic Design Projects Completed

- Delivered over paid design projects (logos, flyers, social media content) to clients in Zambia and beyond

Active Contributor on GitHub

- Maintains several personal and academic projects on GitHub demonstrating frontend/backend integration.
